

# Earthquake **Safety**

**We live in an earthquake area.**

When you feel the ground under your feet shake you are experiencing an earthquake.

**You should...**

**If you are outside,  
drop to the ground.**

**If you are  
inside, drop to  
the floor.**

**Get under  
something like  
a table.**

**Hold on to the  
object that you  
are under.**

**Practicing what to do in an earthquake  
will help you stay calm and take the right actions,  
should you ever experience one.**
