

Power Outages

Knowing what to do in a power outage is important.

Do you know where your emergency supplies are kept in your home?

We often experience power outages. Power outages can last for a few minutes or a few days. We need to have supplies on hand to use if necessary.

We need to have flashlights as well as blankets and a portable radio with batteries so we can listen to our local radio station for information on the power outage.

We should call BC Hydro at 1-800-769-3766 to determine how long the power will be out so we can plan accordingly.
